Press Release

November 15, 2005  
Funai Electric Co., Ltd

To Whom It May Concern:

## **Funai obtains both "BS7799" Certification and "ISMS" Certification**

Funai obtains both "BS7799" Certification and "ISMS" Certification  
Funai Electric Co., Ltd. (Headquarters: Nakagaito, Daito-City, Osaka, Japan;  
President and CEO: Tetsuro Funai) has obtained the "BS7799-PART2: 2002"  
certification on the British standard and the "ISMS Certification Standard (Ver.  
2.0)" certification on Japanese standard for information security management  
systems for the information system division on November 15, 2005.

Funai makes a judgment that the ensuring of information security is the  
commitment to consumers and stockholders in view of growing dependent on  
electric commerce, and attempts to establish the information security  
management system. Consequently, Funai leads to obtain the two certifications  
at the same time

Funai maintains increasing the quality of our information security management  
system and confidence in our customers and stockholders.

### Background of the certification acquisition

The damage or Loss of the information security accident expands significantly  
while increasing the business efficiency with advance of the IT revolution, and  
the after-the-fact policy alone no longer continues business or profit. The  
management is therefore required to minimize the possible risk by establishing  
the information security management system.

### About the BS7799

The BS7799 is a British standard for information security established on 1995,  
and aimed at providing not only technical measure of information security but  
also an effective model of operation including people and organization  
management. Furthermore, the ISO standard under discussion is based on this  
standard.

### About the ISMS

The ISMS is a certification standard for information security used by third party  
certification and registration bodies. The standard is officially operated by the  
Japan Information Processing Development Corporation (JIPDEC) from 2002  
with a view to enhancing the information security in Japan.
