# Funai to Sell TV Sets Derived from its World-class Technologies Exclusively at Yamada Denki Stores in Japan.

### 11 Models in 5 Series (from 4K to 2K) in Stores from Friday, June 2 across Japan

Funai Electric Co., Ltd. ("Funai") will sell 4K TV sets featuring its proprietary ClearPix high picture quality engine for the 4K resolution. The 11 models in five series will be available exclusively at Yamada Denki stores in Japan.

Funai developed its proprietary high picture quality engine for the 4K TV sets to reproduce natural vivid colors. In combination with the wide color gamut panels, the engine achieves the high-definition and high-resolution image with realistic colors and minimal color saturation while enhancing the contrast and vividness.

The products of all the series have a built-in HDD (a memory for the 2000 series) to record TV programs. Depending on the model, the capability ranges from two-week multi-channel recording to one-touch recording. The flagship model (the 6000 series) has a built-in 3 TB HDD to record programs of up to five channels for two weeks.

The products are also designed to work with a smartphone. By installing the Funai Connect app in a smartphone or tablet, the user can watch recorded and live TV programs or set timer recordings for TV programs while away from home. The TV sets are designed to work with Funai recorders which will be concurrently put on the market to create a home network. For example, the 6000 series enables the user to watch recorded programs on a TV set in the bedroom, or watch programs recorded in a Funai Blu-ray recorder (set up in a different room) in the living room. These products help create various opportunities to enjoy watching TV.

Funai reached a basic exclusive distributorship agreement in Japan with Yamada Denki Co, Ltd. ("Yamada Denki") to sell these products exclusively at the Yamada Denki Group stores. Funai will create new value in the TV set market in Japan through close collaboration with Yamada Denki.

## 4K から 2K まで、5 シリーズ全 11 モデルをラインアップ

Since its founding, Funai has offered high-quality, cost-effective audiovisual consumer electronic products based on its unique perspective to meet the needs of the times. In 1985, Funai started selling TV/VCR Combos. During the peak period, Funai manufactured and sold more than 10 million TV sets annually. Today, Funai continues to grab the top share as a Japanese manufacturer in terms of the annual shipment of LCD-TV sets in the U.S. (in comparison with other Japanese manufacturers, in terms of the share of Funai LCD-TV sets shipped in the U.S. in 2015, according to a survey conducted by IHS Markit). Visit a Yamada Denki store to experience the quality of the world-class Funai products.
